Career Objective

BCA graduate specializing in Android development (Kotlin, Firebase) and Java-based web applications (JSP, Servlets, MySQL), with hands-on experience building multi-role, multi-vendor e-commerce platforms from database design to deployment. Seeking a Software Developer role to apply strong DSA and OOP fundamentals to building production-ready applications.

Projects

Shopix - Multi-Panel Android E - Commerce App

Tech : Kotlin, Firebase, Firestore, Razorpay, Cloudinary

- Developed a multi-panel Android e-commerce platform with three separate apps for Buyer, Seller, and Admin roles, supporting a complete multi-vendor shopping ecosystem.
- Implemented real-time data sync using Firebase Firestore for product listings, orders, and vendor management across all three panels.
- Designed role-based access so buyers, sellers, and admins each get a tailored interface and permission set within the same platform architecture.

Sellora - AI-Powered Multi - Vendor E - Commerce Platform

Tech : Java, JSP, Servlets, MySQL, Apache Tomcat, Razorpay, Cloudinary

- Built a web-based multi-vendor e-commerce platform using Java JSP and Servlets, with separate modules for Buyer, Seller, and Admin, deployed on Apache Tomcat.
- Designed and integrated a MySQL relational database to manage products, vendors, orders, and transactions across the platform.
- Implemented secure authentication using hashing techniques (via a dedicated hash generation utility) to protect user credentials.

Education

2023 - 2026	Bachelor of Computer Application
RK University - Rajkot	CGPI - 8.75 / 10
2022 - 2023	HSC
Tapovan School - Rajkot	83.14 %
2020 - 2021	SSC
Tapovan School - Rajkot	81.5 %

Skills

- Partnered with a teammate to build and deploy 2 full-scale multi-vendor e-commerce platforms, covering database schema & backend logic
- Debugged and resolved authentication/data-sync issues across Android and web environments
- Self-taught Kotlin and Firebase through project-based learning, without formal coursework

Languages

English

Hindi

Gujarati

Technical Skills

- **Programming Languages** : Java, Python, Kotlin, C++
- **Web Technologies** : HTML5, CSS, JSP, JavaScript, Servlets
- **DataBase** : MySQL, Firestore
- **Tools & Platforms** : Git & GitHub, IntelliJ IDEA, Apache Tomcat, Android Studio, VS Code, Razorpay, Cloudinary
